Handle Uncertainty Using Probabilistic Methods

Learn about Supporting Tools and Software

See Real World Examples

Specials

- A. Do you have specific questions we might prepare us for?
- B. Bring in some of your major top risks worth having a second opinion/out-of-the-box approach. We will process them on the fly – live – to give you some hands-on insights how we manage risks from qualitative into quantitative analysis.
- C. Do it on your own: all attendees will receive an excel sheet to perform a Monte Carlo Simulation live.

We would be happy to provide some new solutions for your risk management.
